MANDATORY OUTDOOR WATERING RESTRICTIONS

Due to numerous water line breaks in the City of Sterling, water pressure related issues, water demands exceeding the city’s ability to provide treated water, and the need to provide adequate fire suppression water and inside water usage, the City of Sterling, effective immediately (August 2, 2017) is imposing a mandatory outdoor water restrictions on all users of water provided by the city.

Under the mandatory outdoor water restrictions, no outside water of lawns will be permitted.

The city wants to ensure the residents of the city and the extraterritorial water users that it is working hard to resolve these issues and will lift the restrictions as soon as the issues are resolved.
